SUMMARY

Motivated learner with a passion for Game Development and currently focusing on AI/ML. Skilled in tackling challenges through a mix of analytical thinking and creative design. Quick to adapt across different domains, committed to completing projects with focus, and eager to contribute to innovative systems that blend technology with imagination.

PROJECT

VisuoFind – AI-Powered Apparel Visual Search Web Application

- Frontend: React.js, Tailwind CSS | Backend: Spring Boot, PostgreSQL, Python.
- Integrated AI/ML models for image-based and text-based product search and personalized recommendations using ResNet-50 and SBERT.

Merch Vault – Graphic Design Customization E-Commerce Platform

- Developed with React.js, Tailwind CSS, Node.js, MongoDB, and Mongoose.
- Implemented product customization features and interactive UI for user-driven designs.

Bloodworks – Blood Donation and Acceptance Web Application

- Built using HTML, CSS, JavaScript, PHP, and MySQL.
- Designed application layout and implemented database management for efficient data handling.

Dodge Block – Simple lowpoly obstacle dodging game application

- Developed games in Unity Engine, integrating basic physics and collision detection.
- Implemented gameplay logic using C# and designed assets using Blender.

SKILLS

Frontend: React.js, HTML, JavaScript, Tailwind CSS

Backend: FastAPI, Node.js, Python, MySQL, MongoDB

Game Dev: C#, JavaScript, Blender, Unity

Tools: Git, Github

EDUCATION

Bachelors in Software Engineering

Gandaki College of Engineering and Sciences • 2021-2026

- Recipient of partial scholarship for eight consecutive semesters (merit- based).

Diploma in Computer Engineering

Pokhara Engineering College • 2017-2019

- Recipient of full scholarship throughout the period (merit-based).

EXPERIENCE

Frontend Developer - BrandBuilder

Training & Project Experience:

- Completed structured training from basic to advanced Unity and C# game development concepts.
- Gained hands-on experience in React.js, Node.js, and MongoDB through guided projects.
- Received leadership, coordination, and communication training through one-on-one mentorship with industry professionals.
- Strengthened team management and collaboration skills by contributing to multiple group projects.

CERTIFICATIONS

Unity Learning Class - Zerone

- Learned to create Games using Unity Engine and C# as programming language.
- Gained hands-on experience with developing procedure.

Android Studio Learning Class - Zerone

- Learned to create android mobile application and deploy.
 - Gained hands-on experience with developing procedure.
-
